

DFWPM "PLAY MOBILE": PORTABLE WEIGHT REPEATER

DFWPM: radio frequency weight repeater for DFW indicators and MCW crane scales.

DFWPM: dimensions in mm.

Radio frequency weight repeater for DFW indicators and MCW crane scales, easy to transport and view thanks to its small size and to the backlit large digit display.

It also allows to repeat the main scale functions from a distance, thanks to the integrated keypad.

TECHNICAL FEATURES

- Backlit LCD 25mm LCD display with 6 high contrast digits with icons for indicating the active functions.
- 1,5Vdc power supply, with extractable battery box, for functioning with 4 AA batteries.
- Keypad with 5 keys, in polycarbonate.
- Compact and sturdy case, easy to clean and resistant in harsh and corrosive environments.
- Digital Set-Up from keypad or from PC with DINITOOLS.

SERIAL PORTS

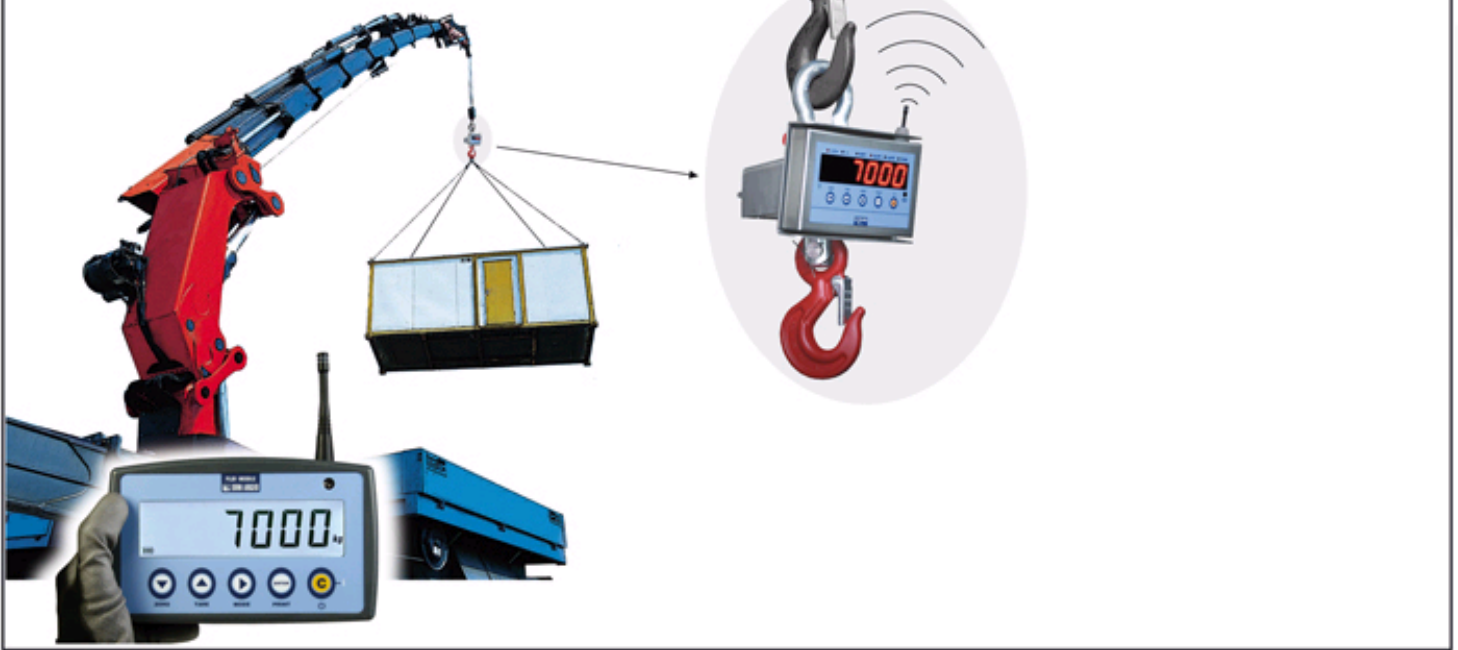

- 868Mhz integrated radio modem, with 15 different frequency channels, easily programmable from PC, for communication with the scale.
- USB port (standard fitted with the DFWPMUSB model), for quick connection to the PC.
- Infrared receiver for functioning with remote control.

FUNCTIONING MODES

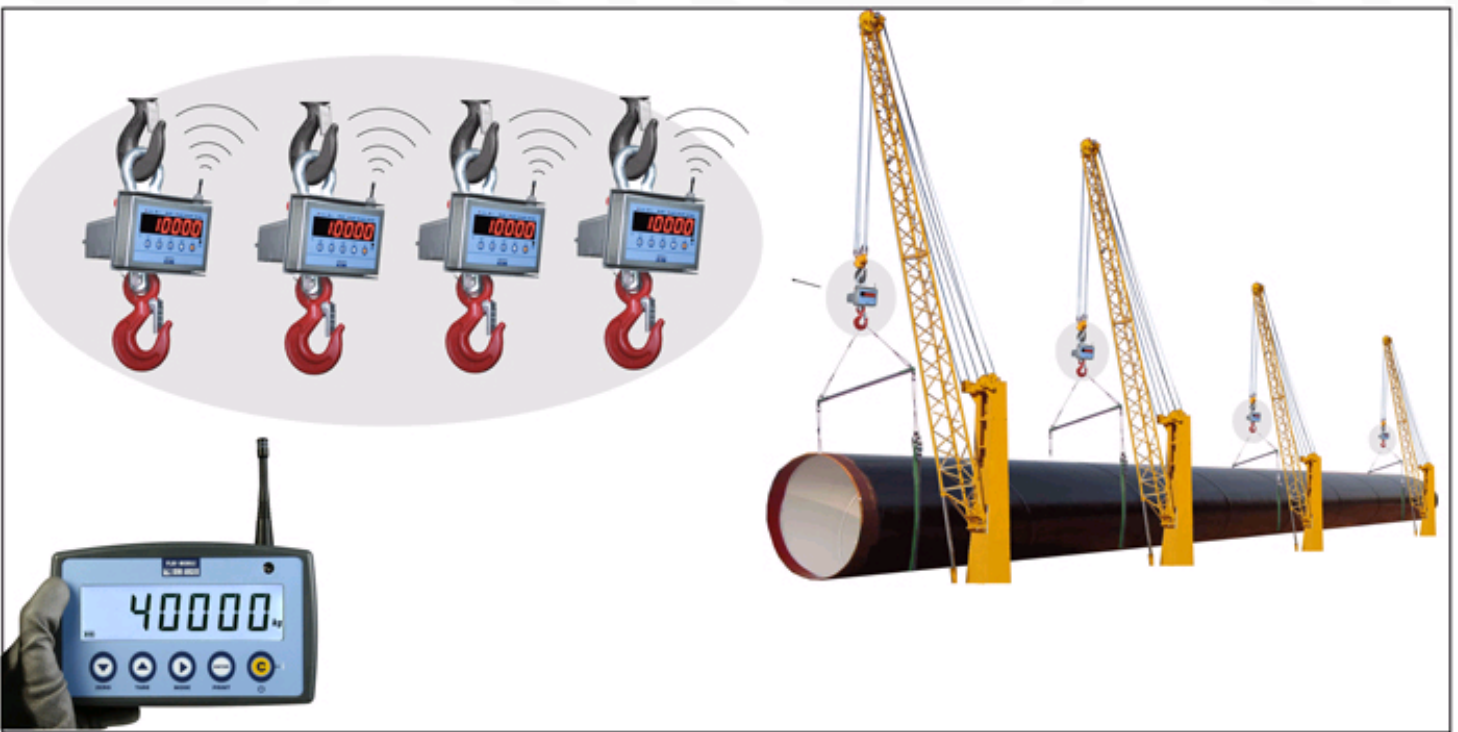

- **Peer-to-peer weight repeater with single scale:**
Function which allows to manage all the main functions of the connected indicator, in other words, ZERO, TARE, PRINT, ENABLING/DISABLING of the FUNCTIONING MODE and SWITCH-OFF.
- **Multiscale weight repeater:**
Function which allows to manage up to 4 independent indicators, with the possibility of operating on the single indicator (functions such as ZERO, TARE, PRINT, ENABLING/DISABLING of the FUNCTIONING MODE) or viewing the sum of the weighs.
